DEMONSTRATION OF PROPOSED FEATURES

Import Data Using Transform Maps (Spreadsheet) — SWTID-2026-3705

Date	15 March 2026
Team ID	SWTID-2026-3705
Project Name	Import Data Using Transform Maps (Spreadsheet)
Maximum Marks	1 Mark

This document records the proposed features demonstrated for the project. The workflow shown in the supplied ServiceNow screenshots covers spreadsheet loading, Import Set creation, target-table creation, Transform Map configuration, and import execution.

Proposed Features

S.No	Feature Name	Description	Status	Demonstrated	Remarks
1	Spreadsheet Data Import	Load spreadsheet data into ServiceNow through the Load Data / Import Set workflow.	Implemented	Yes	Spreadsheet import workflow shown.
2	Import Set Table	Create or use an Import Set table to stage incoming spreadsheet records.	Implemented	Yes	Employee Import (u_employee_import) shown.
3	Target Table	Create the destination table that receives transformed records.	Implemented	Yes	Employee Test (u_employee_test) shown.
4	Transform Map	Map source/import fields to the target table for transformation.	Implemented	Yes	Source and target tables shown in Transform Map.
5	Import / Transform Execution	Run the import process and transform staged records into the target table.	Implemented	Yes	Import Set Run progress shown.
6	Result Verification	Review the import result and confirm that the transformation process completed.	Implemented	Yes	Run result and next-step information shown.

Feature Implementation Summary

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%

Demonstration Evidence

Evidence	Information
Spreadsheet Import	Load Data screen shows spreadsheet file selection, sheet number 1, and header row 1.
Import Set	Import Set table is shown with the Employee Import label and u_employee_import name.
Target Table	Table creation screen shows Employee Test and u_employee_test.
Transform Map	Transform Map screen shows Employee Import as source and Employee Test as target.
Execution	Import Set Run screen shows the processing result and next-step workflow.
